2025-04-06T15:39:13.608+05:30 INFO 11718 --- [spring-hibernate-props] [nio-9191-exec-1] o.s.web.s
Hibernate: select c1_0.id,c1_0.name from Customer c1_0
Hibernate: select a1_0.customer_id,a1_0.id,a1_0.city,a1_0.state,a1_0.zipCode from Address a1_0 whe
Hibernate: select a1_0.customer_id,a1_0.id,a1_0.city,a1_0.state,a1_0.zipCode from Address a1_0 whe
Hibernate: select a1_0.customer_id,a1_0.id,a1_0.city,a1_0.state,a1_0.zipCode from Address a1_0 whe
```

Implement these two methods. You call either one you notice only one query in the console.

- Address.java
- Customer.java
- repository
 - AddressRepository...
 - CustomerRepository...
- service
 - CustomerService.j...

```
import java.util.List;

public interface CustomerRepository extends JpaRepository<Customer, Long> {

    @EntityGraph(attributePaths = "addresses")
    List<Customer> findAll();

    @Query("SELECT c FROM Customer c LEFT JOIN FETCH c.addresses")
    List<Customer> fetchCustomersWithAddress();
}
```

```
Run SpringHibernatePropsApplication
